

Date	Species	Location	Notes
2/18/2019	Robin	Segment 2-Lindsey Lake	Found floating in the water along the riprap Inside primary containment. Appears to have been dead for some time.
2/19/2019	Perch	Segment 1- Lindsey Lake	Found floating along natural portion of the shoreline. No smell of diesel fuel, but feathers appeared to be retaining water
2/20/2019	Cormorant	Segment 2-Lindsey Lake	Found sitting on the bottom of the lake bed. Appears to have been dead for some time. No fins or tail.
2/20/2019	Perch	Segment 1 - Lindsey Lake	Only portions of a bird (leg and feathers) collected in the event that the bird died due to the spill and was scavanged after death
2/20/2019	Unidentified bird	Segment 3	Found sitting on the bottom of the lake bed, just outside of primary containment. Appears to have been dead for some time. No fins or tail.
2/21/2019	Perch	Segment 1 - Lindsey Lake	found sitting on the bottom of the lake bed along the shoreline. Only the head was remaining. Appears to have been preyed upon, unlikely death related to fuel release.
2/21/2019	unidentifiable fish	Segment 2-Lindsey Lake	found outside of secondary boom sitting on the bottom of the lake bed.
	Perch	Segment 4 - near mouth of Lindsey Creek	Sitting on the bottom of the lake bed
2/21/2019	Perch	Segment 4 - near mouth of Lindsey Creek	No apparent sign of external trama. Gills appear red and inflamed
2/21/2019	Juvenile Salmonid	Segment 4 - near mouth of Lindsey Creek	Unable to collect this species. I observed it from inside of primary containment and did not have appropriate decontamination equipment and so was not able to cross the boom outside of the containment zone.
2/22/2019	Perch	Segment 4 - southwest of mouth of Lindsey Creek	No apparent sign of external trama.
2/22/2019	Unidentified fish	Segment 4 - near mouth of Lindsey Creek	No external signs of trama
2/22/2019	Juvenile Salmonid	Segment 4 - near mouth of Lindsey Creek	Decomposing, appears to have been dead for some time
2/23/2019	Slamander	Segment 1 - Lindsey Lake
